PRS issues electronic documents for ships in accordance with the IMO Circular FAL.5/Circ.39/Rev.2

- 1. Validity and consistency with the format and content required by the relevant international convention or instrument, as applicable (FAL.5/Circ.39/Rev.2 4.1.1)**

Electronic certificates issued by PRS S.A. are subject to the same procedures as established for standard paper certificates. The content and format of electronic certificates is the same as in case of corresponding paper versions. The only difference is an electronic seal which confirms consistency of information contained in the electronic certificate and at once identifies PRS SA as the certificate issuer. In the paper version, the written signature of PRS SA employee and traditional seal confirm the consistency of the information placed in the certificate. The applied approach eliminates the necessity of printing out electronic certificate and providing hand-made signature and ink seal.

- 2. Protected from edits, modifications or revisions other than those authorized by the issuer or the Administration (FAL.5/Circ.39/Rev.2 4.1.2)**

Electronic certificates issued by PRS SA are prepared and delivered in pdf format. Portable Printed Document (PDF) is an ISO-served international standard used for transfer of documents. PRS S.A. utilizes built-in functions made available by the PDF to safeguard the document from unauthorized edition and change. In case of any unauthorized change of the electronic certificate content, a message that the certificate is not valid appears.

3. Unique tracking number used for verification as defined in paragraphs 3.5 and 3.6 (FAL.5/Circ.39/Rev.2 4.1.3)

The unique tracking number UTN used for verification of electronic certificate is automatically generated by the PRS SA system. This number is based on random algorithm and has no reference to certificate parameters, dates and other information. The UTN number is embedded in electronic certificates issued by PRS SA.

4. Printable and visible symbol that confirms the source of issuance (FAL.5/Circ.39/Rev.2 4.1.4).

PRS S.A. embeds in electronic certificates visible graphical elements, which explicitly identify the certificate issuer, inform on that the certificate is issued in electronic format and facilitate certificate verification with the use of www gate. The identifying elements are issued on the first page of document and may appear also on subsequent pages, depending on the kind of certificate.

This document is signed electronically in accordance with IMO FAL.5/Circ.39/Rev.2 and its authenticity and validity may be verified in <https://ecert.prs.pl> using Unique Tracking Number (UTN): 108A-77D6

5. Administrations that use websites for online viewing or verifying electronic certificates should ensure that these sites are constructed and managed in accordance with established information security standards for

access control, fraud prevention, resistance to cyberattacks and resilience to man-made and natural disasters (FAL.5/Circ.39/Rev.2 4.2).

PRS S.A. ensures the highest safety level during using on-line services for certificate verification. Communication between the user browser and the server is coded with use of https protocol and is safety certified. The server is protected from unauthorized access by a firewall. PRS SA cooperates with a firm being market leader specializing in the protection of servers to ensure additional protection against cyberattacks. PRS S.A. performs also the data backup. The websites have been prepared based on HTML5, CSS3, JS and are managed by qualified employees.

- 6. Shipowners, operators and crews on ships that carry and use electronic certificates should ensure that these certificates are controlled through the safety management system, as described in section 11 of the International Safety Management Code (FAL.5/Circ.39/Rev.2 4.3).**

PRS S.A. makes available to its Clients and to cooperating persons all mechanisms needed for the realization of established objective, including delivering information on how to authenticate the electronic certificate and how to perform its verification.

- 7. Electronic signatures applied to electronic certificates should meet authentication standards, as adopted by the Administration (FAL.5/Circ.39/Rev.2 4.4).**

PRS SA cooperates with Krajowa Izba Rozliczeniowa (the National Clearing House), recognized on the European and world scene, within the scope of generating electronic signatures for electronic certificates. The electronic signature is generated with the use of algorithm SHA256 RSA and is automatically verifiable by Online Certificate Status Protocol (OCSP).

Kind Regards
Piotr Tomczak
Deputy Director of Ship Division
